

Cable TV as well as public airwave tv must be monitored. Psychological testing has proven beyond douth that violent tv strongly impacts social developeent... how people respond to stress and disagreements. We are seeing an increase in poor interaction choices by many people. We need to raise the standard of decency. Too many kids are being raised by "adults" who never became mature themselves, and thus cannot be trusted to train up their children properly.

We have wrongly been protecting the "rights" of pornographers and the leaches of society that make a buck off a cheap thrill. Let's start protecting our innocents instead!
